

GUIDE FOR INTERNATIONAL PATIENTS

Dental implants in Colombia: *your two trips,* explained.

First: a complete implant is *three parts*

3 · The crown
The tooth you see.

2 · The abutment
Connects the other two.

1 · The implant
Replaces the root.

U.S. REFERENCE POINT

Median of *$4,000* for one complete implant.

Survey of 278 practices in six metro areas. Dental Economics, February 2026.

Some quotes cover only the implant and others all three parts: when you compare, make sure they cover the same thing. We do not publish prices because they depend on your case: you get an estimated quote in your virtual consultation and the exact one at your in-person evaluation.

Missing several teeth? It is not always one implant per tooth. Two implants can hold a fixed bridge of three or more crowns, and four or six can hold a full arch. Your diagnosis shows which one applies to you.

Always ask which implant brand you are getting and keep that information: the FDA recommends it. Here we work with Straumann, Neodent and Bicon.

Your two trips, *and the wait*

Between the two trips, bone fuses with the implant. That is why it is almost never a single trip.

TRIP 1

Diagnosis and surgery

CT, 3D scan and guided surgery: 30 to 45 minutes for one implant; several can take a morning.

→

AT HOME

4 to 6 months

Bone integrates with the implant. Meanwhile a temporary can be used, depending on the case.

→

TRIP 2

Your final teeth

Designed and made in our in-house lab, in 2 or 3 appointments.

Full arch (All-on-4 or All-on-6)? One or two trips, depending on your case. The schedule is set in your plan.

Who operates *and with what*

9 specialists, 20 years

Led by Dr. Carlos Acevedo. Licensed under Colombian regulations and supervised by the Supersalud, the national health regulator.

A license you can verify

In ReTHUS, Colombia's public registry of licensed health professionals (in Spanish; search by name).

Straumann, Neodent and Bicon

Manufacturer's international warranty on the titanium. Most treatments: up to 5 years of warranty.

All at the clinic

CT, 3D scanner and our own dental lab.

After surgery

24 TO 48 HOURS
Ice and rest
Ice packs, soft foods and taking it easy.

DAY 7 TO 10
Check-up
Stitches come out and healing is checked.

4 TO 6 MONTHS
Integration
Bone finishes fusing, with check-ups.

If you are already home by day 7, your plan explains how that check-up is done.

First days: yes

Lukewarm soups · Mashed foods · Yogurt · Eggs · Smoothies

First days: avoid

Hard or crunchy food · Very hot food · Chewing on the area · Sun and beach

If something comes up at home: follow-up is remote, by chat and by phone, and many questions are solved with photos. Most treatments come with up to 5 years of warranty.

Keep the brand and reference of your implants. With that, a dentist in your city can service them. When you finish, we give you sheets with your aftercare instructions and medications.
